CAPTURING
YOUR PRECIOUS
MOMENTS

ANTWERP/LIÈGE/PARIS

The DNA of Laurence's designs has always lied into a bride palette of colors. Intense, deep, saturated hues that she finds in the precious stones she selects carefully worldwide. Her desire is to offer refined jewelry with a story, a meaning. She wishes her feminine customers to stand out and express themselves with a unique and eye-catching piece. This concept of unicity of each of her design is made possible as each colored stone is unique, by its shape, cut, measures, tone.

All her pieces are meticulously drawn and 3D-designed before being crafted by hand in her **Antwerp atelier.**

In her new capsule

« **AURORA** »

composed of fourteen statement pieces, Laurence took her inspiration in the mandalas she used to color when she was a child.

A mandala is a spiritual symbol of the universe in its ideal form.

It is for her a meditation tool.

It opens up an interpretation of her own universe, life, inspirations, style.

She always liked the details of their shape and complex pattern, and mixes intense and warm colors to make them alive.

This new collection falls within her proper definition of

« **High-end Jewelry** ».

Each piece is a real treasure, and all its details have been carefully imagined and designed for a whole year by Laurence & her precious team.

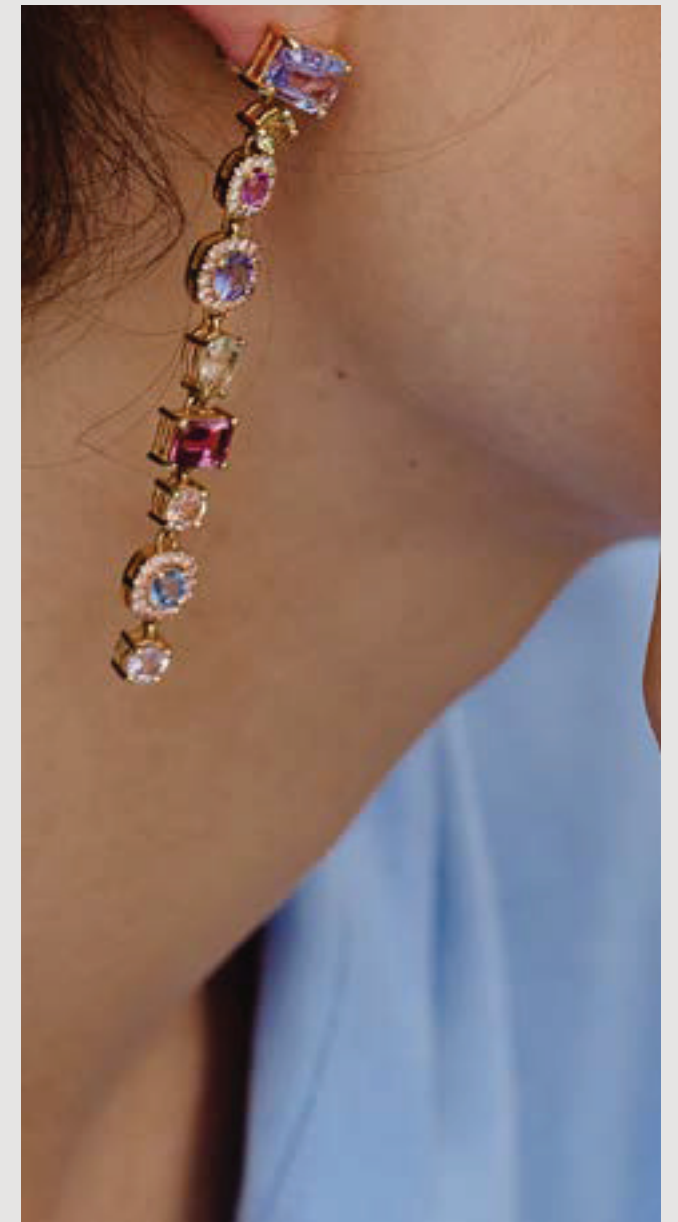

Laurence and her team of goldsmiths always make **3D drawings** of the jewelry pieces to get a first feeling of how they will look in terms of aesthetic, proportions and color combinations.

This is also how she proceeds
when a customer makes an
order for a tailor-made piece.
When approved, it is time to
start to craft
the unique pieces.
